

7.3 (VS20..RF), 10.9 (VS10..RF) ZigBee software version

### Introduction

VS10..RF / VS20..RF is a room temperature thermostat that is used for wireless control of iT600 series devices such as: KL08RF wiring centre, TRV radiator valve and RX10RF boiler receiver. In combination with Universal Gateway UGE600 this regulator can be controlled over the Internet using SALUS Smart app (Online mode). Without Internet connection (Offline mode) thermostat works locally, but its communication with other devices must be done through the coordinating unit - CO10RF. Full version of the PDF manual instruction is available on the website www.salus-controls.eu

#### Product compliance

EC Directives: 2014/30/EU, 2014/35/EU, 2014/53/EU i 2011/65/EU. Full information is available on the website www.saluslegal.com

Use in accordance to national and EU regulations. Use the device as intended, keeping it in dry condition. Product for indoor use only. Installation must be carried out by a qualified person in accordance to national and EU regulations.

SALUS T45 IP30

CE

**Power Supply:** 230V AC (L, N terminals)

#### 1.2 Terminals:

- external air or floor temperature sensor
- external contact (occupancy sensor)
- external hot water thermostat (only with KL10RF configuration)

Montage: 60mm concealed box

# Wiring diagram - VS20WRF (white), VS20BRF (black)

Power Supply: 4xAAA (alkaline batteries)

- S1, S2 Terminals:
- external air or floor temperature sensor
- external contact (occupancy sensor)
- external hot water thermostat (only with KL10RF configuration)

**Montage:** surface mounting (need to remove back cover)

#### **Button Functions**

| Button                      | Function   |
|-----------------------------|--|
| ^                           | . Increasing/decreasing temperature or other value                         |
| ~                           |  |
| _ <                         | - Selecting the operating mode or switching between values                 |
| <u> </u>                    |  |
| <b>√</b> ∘                  | Short press - approve selection<br>Hold - enter / exit to or from the menu |
| ^+ <b>~</b>                 | Hold down these buttons to lock or unlock the keyboard                     |
| <b>√</b> ₀ <sup>+</sup> ⟨+⟩ | Hold down these buttons to enter installer mode                            |

## Select the type of ZigBee coordinator:

Choose a ZigBee coordinator and prepare it to work with iT600 series

- Online connected to the Internet via the UGE600 gateway
- Offline -the ability to connect to the Internet using the **UGE600** gateway

Offline - without Internet connection with CO10RF

will be controlled by thermostat. Pairing method of each devices is described in the manual instruction of a particular device.

Thermostatic radiator

RX10RF

#### Installation - first start up

KL08RF

relate to the software version

Thermostat starts up in a simplified configuration mode. You can choose to pair with:

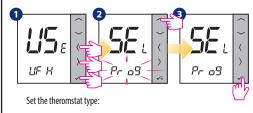

UFH - KLOSRF or KL10RF wiring centre (underfloor heating)

 $\neg R d$  - Thermostatic radiator valve (radiator heating)

**Note:** Thermostat is set by default as programmable (weekly).

# Installation - extended configuration

If the simplified configuration is not suitable, run the expanded configuration by holding 3 keys as below until SEL PROG appears:

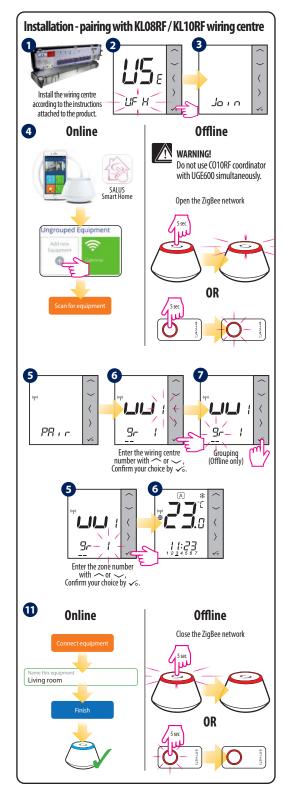

Programmable (weekly)

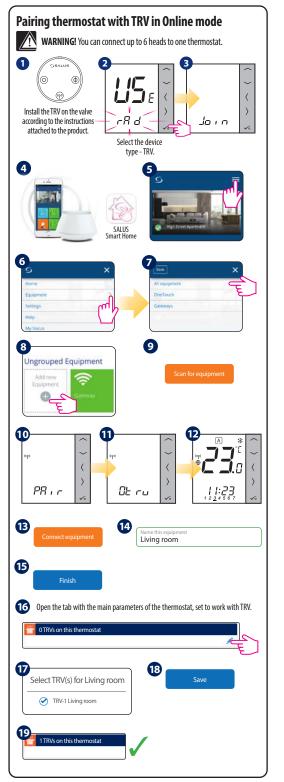

d 195

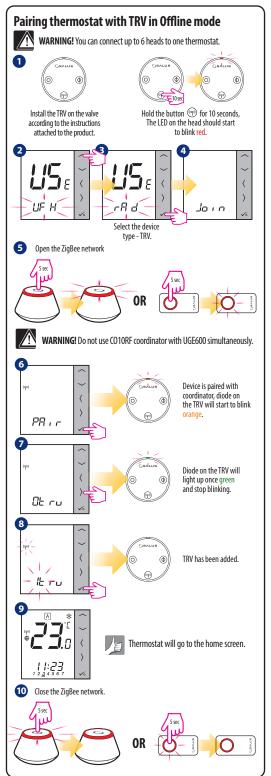

Hot Water timer (works only with KL10RF)

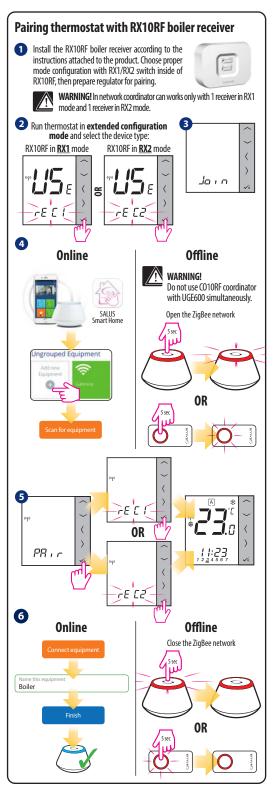

After approval of the type of thermostat, choose the type of device to cooperation with:

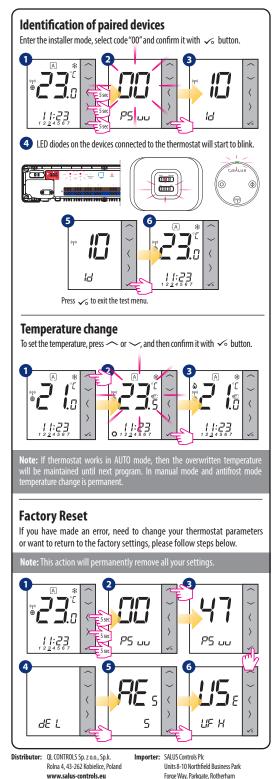

☐F H Underfloor heating

valve (radiator heating)
